April Meeting

The April meeting will take place on Thursday April 30th at 7:00PM on ZOOM via the internet. John Webber will be demonstrating “6 way screwdriver” (that won’t roll off the bench).

President's Note

Hello woodturners,

I hope this newsletter finds you well. So much has changed this year, we started off with the Woodworking Show, a pizza party & auction, then a great demo by Rick Angus & a pen turning workshop at Dan Merlo’s, we had several pen turning events scheduled, as soon as things are safe we will reschedule them.

Our next meeting will be on **THURSDAY APRIL 30 at 1900 (7:00pm)**. You will receive an invite to a ZOOM VTC on Monday, if you do not receive an email by Monday night 4/27 then email or call me, your info may need to be updated. If you have never tried this before and need assistance email or call me. I can assist, and we can have a test session so Thursday night will go smoothly. You can use a desktop, laptop, Ipad or smart phone. This will be a trial run for these kinds of meetings. After the meeting, I welcome feedback.

We will start off with a business meeting, then show & yell session, I need you to text or email me a nice photo or 2 of what you have done I will display it for all & you can unmute yourself & tell us about it.

We will have a drawing for gift certificates as usual.

We need to decide what to do with all of the rough turned bowls donated by Emery.

Next, I will present our club challenge for the year.

Then I will do a short demo on a \$2.00 6 way screwdriver that won’t roll off the bench.

Please be patient, this is new to most of us, we may have a few hiccups along the way, but we will do our best to provide a good meeting.

See you in cyberspace.

John
